

RoHS CERTIFICATION OF COMPLIANCE

European Directive 2002/95/EC on the Restriction of Hazardous Substances

The European Community (EC) directive 2002/95/EC, also known as the RoHS Directive, restricts the use of hazardous substances listed below in the manufacture and sale of electrical and electronic equipment.

Based on the information provided to us by the suppliers of raw materials used in the manufacture and delivery of our products and services, NK Technologies maintains a list of specific model numbers and product families designated as RoHS Compliant for orders placed on or after October 1, 2006.

RoHS Compliance shall be taken to mean that,

- With regard to existing designs, RoHS certified substitutions for all materials and components have been specified.
- Components used in the production of compliant parts are certified RoHS compliant and our suppliers have confirmed this compliance status.
- Soldering operations involved in the production of compliant products are performed using lead-free solder.
- Products bear an RoHS compliance logo indicating their status.

Additionally, RoHS Compliance production safeguards assume,

- Where appropriate, process reviews have been performed to ensure the absence of restricted substances.
- Compliant components and materials are segregated from non-compliant components and materials while in inventory.

For purposes of RoHS certification, any Product/Model Number so designated shall contain less than the concentration value of restricted substances by weight in homogenous materials specified as follows:

- | | |
|----------------------------------|------|
| • Lead | 0.1% |
| • Mercury | 0.1% |
| • Hexavalent Chromium | 0.1% |
| • Polybrominated Biphenyls | 0.1% |
| • Polybrominated Diphenyl Ethers | 0.1% |

Please contact our factory for information regarding the RoHS compliance status of any NK Technologies product and/or to obtain specific RoHS Compliance Certificates.
