

## RoHS Certificate of Compliance

Neilsen-Kuljian, Inc., doing business as NK Technologies RoHS status is based on information provided by our raw material manufacturer's stated compliance to EU RoHS Directive 2011/65/EU and its amendments, including Directive (EU) 2015/863 respectively.

In consideration thereof, we believe, to the best of our knowledge, that the products we design, manufacture and market either do not contain any of the 253 substances of very high concern or contain greater than .1% by weight of the currently defined substances as defined by European Chemical Agency (ECHA), last updated February 6, 2026. Should we become aware of new information to the contrary, we will first work with our suppliers to eliminate and/or reduce the restricted substance source and/or if all else fails, remove them as approved suppliers.

Neilsen-Kuljian is committed to ensuring the health, safety, and well-being of people and the environment worldwide and will continue to practice these principles in our global business.
