

Conflict Minerals Statement

Neilsen-Kuljian, Inc., doing business as NK Technologies, supports the goals and objectives of Section 1502 of the Dodd-Frank Act, the purpose of which is to prevent the use of conflict minerals that directly or indirectly finance or benefit armed groups in The Democratic Republic of the Congo (DRC) and/or an adjoining country (as defined in the Act). Conflict minerals include: Columbite-Tantalite (i.e. Coltan and Tantalum), Cassiterite (i.e. Tin), Gold, Wolframite (i.e., Tungsten) and their derivatives, and may be expanded to include any other minerals and their derivatives determined by the U.S. Secretary of State to be financing the DRC conflict.

Following the implementation of the Dodd-Frank Wall Street Reform and Consumer Protection Act signed into law on July 21 2010, Neilsen-Kuljian reached out to its supply chain in order to determine if they use any of the aforementioned conflict minerals that were sourced in Democratic Republic of the Congo and/or adjoining countries.

Additionally, we have implemented internal sourcing control procedures whereby new components required for sustaining and/or new product development must have statements from the component manufacturer attesting to the fact that they have conducted the appropriate due diligence research regarding the potential inclusion of conflict minerals and they have concluded that conflict minerals are not used in the manufacturer of their components.

In consideration thereof, we believe, to the best of our knowledge, that no conflict minerals are present in our products. Should we become aware of new information to the contrary we will first work with our suppliers to eliminate the unacceptable conflict mineral sourcing and/or if all else fails remove them as approved suppliers.

Neilsen-Kuljian is committed to ensuring the health, safety and well being of people and the environment worldwide and will continue to practice these principles in our global business.
