

# VTU-OS SERIES

## High Voltage DC/AC Voltage Transducers

VTU-OS Series Voltage Transducers provide very high accuracy and safety in a panel or DIN rail mounted case. The one sensor design can measure DC or AC circuit voltages to 1200 volts, and produce an analog signal directly proportional to the voltage connected. This provides a very valuable tool to spot issues with power generation (conventional and alternative sources) like brownouts and phase loss. The voltage will be present on the line side of a disconnect even when the breaker or switch is open.

### Voltage Transducer Applications

#### Photovoltaic Panels

- Connecting panel outputs in series increases the voltage sent from the panels to the load up to 1200 volts DC. The VTU is designed to measure this safely.

#### Water Delivery and Treatment

- Measure the AC voltage to pumps and aerators and shut them down if the supplied voltage falls to a dangerous level.

#### Cranes and Lifting Apparatus

- DC motors are used to lift, place and position heavy objects, as they have full torque capacity at zero speed. Use a voltage transducer to be sure that the field windings have voltage to keep the motor speed under control.

### Voltage Transducer Features

#### Industry Standard Output Options

- 4–20 mA, 0–5 and 0–10 VDC.
- Compatible with most automation and control systems.
- Output proportional to RMS voltage.

#### Externally Powered

- 24 VAC or DC with low power consumption.

#### Simple Conductor Termination

- Primary circuit uses self-tightening terminals.
- Power supply and output terminals are finger-safe.

#### Panel or DIN Rail Mount Options\*

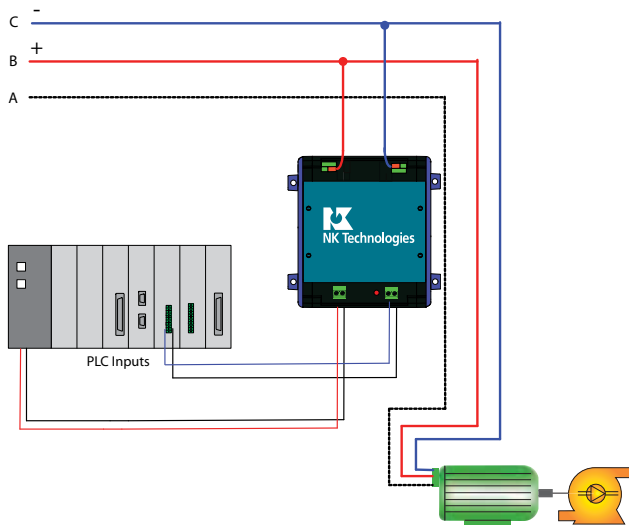

- If a DIN rail is not available, use the screw mounting option to attach to a back panel.
- Power supply is isolated from input and output.

#### UL/cUL Approved, CE Pending

- Accepted worldwide.

\*For information on the DIN rail accessories kit, see page 144.

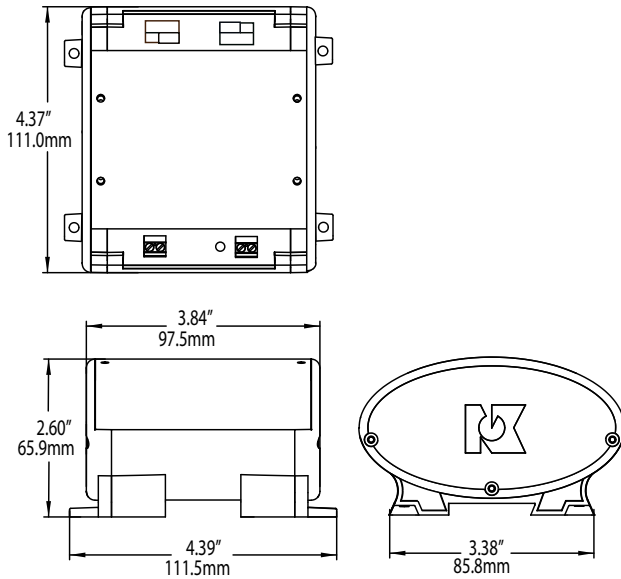

VTU-OS Measures Both AC and DC Voltages

OS Case

### Voltage Transducer Specifications

<b>Power Supply</b>	24 VAC/DC (22–26 VAC or DC); power supply is isolated from output signal
<b>Power Consumption</b>	<2 VA
<b>Input Range</b>	0–800, 1000 or 1200 VAC or DC
<b>Output</b>	<ul style="list-style-type: none"> <li>• 4–20 mA</li> <li>• 0–5 VDC</li> <li>• 0–10 VDC</li> </ul>
<b>Output Loading</b>	<ul style="list-style-type: none"> <li>• 4–20 mA: &lt;400 Ω</li> <li>• 0–5/10 VDC: &gt;100 KΩ</li> </ul>
<b>Response Time</b>	100 ms
<b>Accuracy</b>	<1% FS
<b>Isolation Voltage</b>	UL listed to 1270 VAC, tested to 5 kV
<b>Frequency Range</b>	0–400 Hz
<b>Case</b>	UL94 V-0 Flammability Rated
<b>Environmental</b>	-4 to 122 ° F (-20 to 50° C) 0–95% RH, non-condensing
<b>Listings</b>	UL/cUL, CE pending

### Voltage Transducer Connections

### Voltage Transducer Ordering Information

Sample Model Number: VTU10-420-24U-OS  
AC or DC voltage transducer, 0–1000 V primary, 4–20 mA secondary, 24 VAC/DC power, DIN or panel mount case.

#### (1) Range

8	0–800 V
10	0–1000 V
12	0–1200 V

#### (2) Output Type

005	0–5 VDC
010	0–10 VDC
420	4–20 mA

#### (3) Supply Voltage

24U	24 VAC/DC external power supply
-----	---------------------------------

#### (4) Case Style

OS	DIN rail or panel mounting case
----	---------------------------------

Voltage Transducers

Test & Evaluation Units for OEMs

Free program expedites evaluation process. See page 3 for details.
